Art Unit: 2111

1. Claims 1-17 remain for examination.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, 12, 14, and 16, drawn to a *configurable FSM enabled by a microinstruction field value*, classified in class 712, subclass 208.
 - II. Claims 9 and 10, drawn to a *configurable FSM implementing a portion of a microinstruction in parallel with the processing circuitry*, classified in class 712, subclass 24.
3. The inventions are distinct, each from the other because of the following reasons: Inventions of *Group I* and *Group II* are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because *the invention of group I can be used in a system without processing a portion of a microinstruction in parallel with a processing circuitry*. The subcombination has separate utility such as *use in a system without enabling the FSM based on a microinstruction field value*.
4. Because these inventions are distinct for the reasons given above and the search required for *one group* is not required for *the other group*, restriction for examination purposes as indicated is proper.
5. Claims 11, 13, 15, and 17 recite limitations of both inventions of *group I* and *group II*. Upon the allowance of the elected group of claims, Claims 11, 13, 15, and 17 reciting all the limitation of the allowed claims would be allowed. Applicant(s) are advised that if any such claim(s) depending from or including the limitations of the allowed claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2111

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
